Fun Water Facts

SANDY

Sandy's Fact:
Did you know that there is no new water? It's recycled over and over. In fact, the water you use today may be made up of the same water molecules that the dinosaurs used millions of years ago.

BROOKY

Brooky's Fact:
Did you know that once water becomes polluted, it is very difficult to clean up? It usually costs much more to clean up polluted water than it does to prevent water from becoming polluted.

TERRY

Terry's Fact:
Did you know that even a small change in the quality or quantity of water can cause serious problems for animals and plants around a river, creek, lake or wetland? Remember, every living thing on earth needs water to survive.

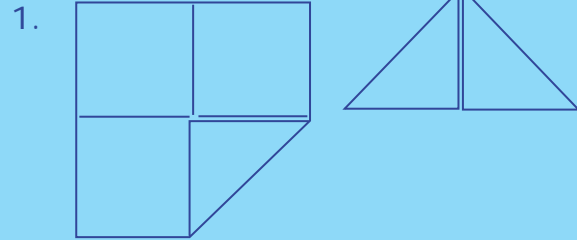

ROCKY

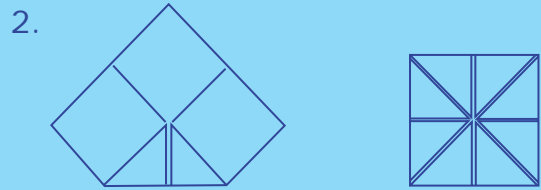

Rocky's Fact:
Did you know that you can make a big difference in keeping water clean and helping to conserve water? By not littering and being careful about how much water you use, you can help to protect our water supply.

How to make your waterpicks game

Lay the square face down on a flat surface, fold all 4 corners of the sheet into the centre, forming a smaller square.

Flip the smaller square over and fold all 4 corners into the center again.

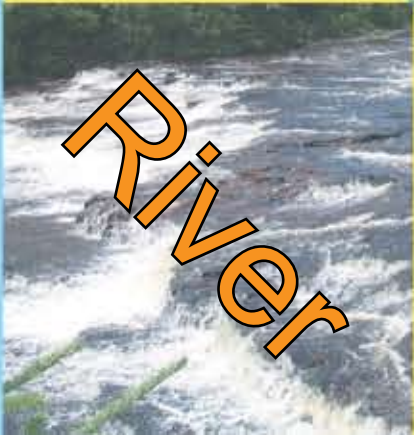

Then, fold it half one way, open, then fold in half the other way. Then stick your two thumbs and two forefingers into each of the 4 flap pockets. Fingers should press centre creases so that all 4 flaps meet at a point in the center.

How to play your waterpicks game

Ask someone to pick a type of water area from one of the four flaps, marsh, lake, stream, river. Open and close the game, first in one direction then the other equal to the number of letters in the word they select (e.g. 4 for lake).

Ask the player to select one of the 4 visible numbers, open and close the game again that number of times.

Ask the player to select one more number, then open the flap to reveal a watershed character.

Hi, I'm Sandy, the Great Blue Heron, I can be found in wetlands at the water's edge. Some of my favourite foods include fish, frogs, insects, snakes, turtles, and small birds. I depend on a healthy wetland to give me a place to live and food to eat.

Hi, I'm Rocky, the Crayfish, I can be found in clean streams, rivers and lakes. Some of my favourite foods include snails, algae, insect larvae, worms, and tadpoles. If you see me in a stream or river, chances are it's healthy.

Hi, I'm Terry, the Painted Turtle, I can be found in ponds, lakes, marshes and slow moving streams, rivers and lakes. Some of my favourite foods include snails, insects, crayfish, duckweed, water lilies and algae. I like to lie in the mud and bathe in the sun.
